ESE-38x Pre-Lab Submission FAQ   ESDL

1. What items are typically required for ESE-38x pre-lab assignments?

Items typically pre-lab checked, via timely electronic submission, include your full and complete schematic drawing and a fully commented source listing file.

The complete list, summary, or indication of all the required items for a respective pre-lab submission is contained in the weekly laboratory description document, which is posted on BlackBoard (BB) under Course Documents.

2. How are items to be electronically submitted each week?

All pre-lab items required for an experiment must be electronically submitted using BlackBoard's "Assignment" tool.

3. Are pre-lab assignments submitted through the main course link or through a student's lab section link? That is, should a student use the following course link…

[1118-ESE-380-SEC01-92981: -ESE 380.01 (L01-L05) Embedded Microprocessor Systems Design I - Fall 2012](#)   *[This link is for sections L01-L05.. NG for assignments]*

Or alternately, the student's available lab section course link?

1118-ESE-380-SECL02-92983: -ESE 380.L02 Embedded Microprocessor Systems Design I - Fall 2012   *[This link is just for section L02.. Must be used if in lab section 02]*

The second link (or the equivalent for YOUR lab section) must be employed for assignment submissions. Accordingly, all student design team submissions MUST be made through their respective ESE380 LAB SECTION Course Link. For example, if you are in section #2, then you would use the latter of the two links provided above.

4. What is the submission deadline for required pre-lab items?

Pre-lab items that are required for an experiment must be submitted electronically by 9:00 PM (21:00 Hours) OF THE DAY BEFORE YOUR LAB SESSION.

> Ex For Lab Section #1, which is Wednesday 8:55 – 11:55 AM…
> The pre-lab submission deadline is Tuesday, at 9:00 PM.
>
> For Lab Section #5, which is Friday afternoon from 1 – 4 PM…
> The pre-lab submission deadline is Thursday, at 9:00 PM.

5. What happens if pre-lab materials are submitted after the deadline?

If a student group misses the deadline for pre-lab submission, they receive NO pre-lab credit for that experiment. **This will be a FIRM policy requirement for the entire semester.**

6. What formats are acceptable for pre-lab submissions?

The only acceptable file format is Adobe .pdf. As such, all items to be submitted for pre-lab must be properly oriented for printing, and converted (typically printed) to a .pdf "binder-type" of file.

The required content for the binder .pdf file is fully discussed in the "Pre-lab Assignment Submission Procedure" document, which is available on BlackBoard.

7. What orientation is required for the .pdf binder file?

You MUST submit all items using a PORTRAIT PRINTING ORIENTATION. That is, all documents must print so that they FILL THE PAGE when printed using PORTRAIT orientation. If not sure what this means, see Scott Tierno.

8. How can I learn more about using the Assignment submission function on BlackBoard for submitting ESE-38x pre-lab items?

Blackboard Help:
Select *Course Tools* > Blackboard Help > Table Of Contents > Tests and Assignments
(There is quite a bit of useful information about assignments and safe-assignments.)

Blackboard Posted ESDL Document: "ESE-38x Pre-lab Submission Procedure"
Select … *Documents* > Lab Related Documents
